Moto-X Cartridge

The revolutionary Moto-X Cartridge serves as the Bomber's dynamic heart n' soul. This 'open bath' hydraulic cartridge directly descends from our famed Magnum Moto fork. The Moto-X is the most reliable and sophisticated cartridge ever designed and here's why:

- Internal oil pressure is eliminated which makes seal failures a thing of the past
- All alloy CNC cartridge assembly
- Infinitely adjustable "Special Sensitive Valving"
- CNC alloy preload adjuster
- Seal-less 'no blow' cartridge design
- Large oil volume for quality damping performance

OPEN BATH DESIGN:

- Cartridge sits in a bath of oil keeping it cool & eliminating damping fade
- Oil keeps the fork feeling buttery smooth & stiction free
- Oil circulates from the cartridge into the leg via a high pressure valve

COIL SPRINGS:

- 15mm preload adjustment
- Non-temperature sensitive
- Extremely durable-long life
- Superior sensitivity & hyper-high speed reactiveness
- Lightweight open wound design
- 3-spring rates available (soft-med-stiff)
- Easily interchangeable
